

Investment Law

The subject of the course "Investment Law" is the investment relationship, ie social economic relations between business investment and investments on sale of investments.

The course "Investment Law" aims to promote training in management and provides students an understanding of the general principles of investment relations. Discipline precedes the development of related courses "Law", "Commercial Law". Studying discipline "Investment Law" is one of the final process of mastering the students gained knowledge on economic and legal subjects. The study "Investment Law" provides better absorption of such subjects as "International Management", "International credit-settlement and currency relations", "Management of the international competitiveness of enterprises."

The purpose and objectives of the course

The aim of the course is to develop students' abilities: to master knowledge of the basic provisions of the investment law; to form an idea of the sustainable investment law as an independent branch of law, its sources, principles and standards and prepare students for independent practice in this area; teaching students practical skills to implement the knowledge gained by analyzing the existing sources of investment law, their place in the national law of Ukraine, and the practice of their application.
